Mission

To provide scientific service, expertise, skills, and tools in support of CDC's national efforts to promote health; prevent disease, injury and disability; and prepare for emerging health threats.

Programs

- Health Statistics
- Behavioral Risk Factor Surveillance System
- National Notifiable Diseases Surveillance System
- Guide to Community Preventive Services
- *Morbidity and Mortality Weekly Report*
- Public Health Informatics
- Laboratory Science, Policy and Practice
- Public Health Workforce and Career Development
- *CDC Vital Signs*
- Public Health Associate Program

How We Work

- Build a strong, efficient, and sustainable U.S. public health laboratory system through promotion of multi-state testing consortia, interoperable systems, streamlined testing processes, and advanced management methods.
- Produce Epi Info™, used globally, for rapid assessment of disease outbreak.
- Develop new and innovative informatics and information technology tools, including uses of the Internet cloud to foster information sharing and use, the development of mobile applications for public health, and prevention-oriented decision support for clinical providers and state and local public health departments.
- Provide data access services that allow state and local health departments and CDC to quickly share information.

Fast Facts

- Home of the first Department of Health and Human Services (HHS) system to move completely to a distributed cloud computing environment that provides a cost-saving, collaborative, shared environment to advance public health surveillance practice and activities.
- Supports state and local public health departments and CDC programs in maximizing the benefits of expanding health information automation, including fulfilling the population health objectives of the HHS Electronic Health Records-Meaningful Use (EHR-MU) program.

CDC—Public Health Scientific Services

Performance Highlights

FY 2014 President's Budget | \$539 Million

2012
67
30
2010
CDC WONDER
 (Wide-ranging Online Data for Epidemiologic Research) online databases from 2010–2012, increased from 30 to 67 online databases

1.8 million communication channels
 for distribution of *CDC Vital Signs*

2012
26%
2010
 increase of *Morbidity and Mortality Weekly Reports* electronic and print subscribers.

339 CDC trainees
 are in state, tribal, local, and territorial public health agencies

FY2014 Budget Request

A total of \$539 million requested includes:

- \$22 million increase above the FY 2012 Level
- \$144 million in Budget Authority
- \$325 million from Public Health Services Evaluation funds
- \$70 million from Prevention and Public Health Fund

Budget Highlights

- Maintains capacity to support fellowship programs, including EIS, which provide robust experiential learning while filling critical gaps in the public health workforce, and provide continuing education and training for the existing health professional workforce.
- Supports ongoing quality, timeliness, and accessibility of public health data for decision-making; support development of methods to improve quality; and support access to information from electronic health records.
- Implement the Working Capital Fund to achieve greater efficiency and transparency of business support services (BSS). The 2014 request distributes a portion of the BSS appropriation to the program's budget line based on the program's historical business service consumption.

Funding History

Public Health Services Evaluation Funds
 Prevention and Public Health Fund (PPHF)
 Budget Authority

FY 2012 and FY 2013 amounts have been made comparable to FY 2014 to reflect proposed Business Services Support realignment
 PPHF for FY 2013 is not final as of 3/15/13
